

What is It's Party Time?

It's Party Time is a seven session drug & alcohol prevention curriculum for student 6th grade and up. It's a simulator in the form of a board game that lets kids experience the financial, social and health consequences of using tobacco, drugs and alcohol. The class divides up into six teams and is assigned a drug of choice which includes:

- * Meth
- * Prescription Pills
- * Alcohol
- * Marijuana
- * Tobacco
- * Non-User

Each team is required to manage a budget which includes selecting their home, auto and fun & leisure activities. They attempt to maintain their lifestyle while experiencing the consequences of their specific drug of choice.

The program connects the three most important authority figures responsible for raising drug free kids.

The school, law enforcement and most importantly the parents. We are not just asking parents to talk to their kids about drugs but we are arming them with the information which gives them the confidence to address the issue.
